Education

Bachelor of Technology in Computer Science & Engineering

Expected May 2027

Maharashtra Institute of Technology, Chhatrapati Sambhaji Nagar
Selected for B.Tech Honours with Research Programme (2026)

Profile

Computer Science & Engineering student focused on **Cloud Computing, Linux/Red Hat, DevOps and Cybersecurity**. Hands-on experience building containerized systems, infrastructure automation, AI-assisted DevOps workflows and security-focused projects using Linux, Podman, Ansible, Docker and cloud platforms.

Technical Skills

Cloud: AWS, Oracle Cloud Infrastructure, Google Cloud Platform, Vercel, Render

DevOps & Infrastructure: Linux, Red Hat Enterprise Linux, Docker, Podman, Ansible, Kubernetes, OpenShift, Git, GitHub, Bash

Cybersecurity: Network Security, Security Compliance, Cybersecurity, Digital Forensics, Linux Security, REST/API Security Concepts

Programming: Python, Java, C, JavaScript, SQL

Development: Node.js, Express.js, React.js, REST APIs, PostgreSQL, SQLite, Supabase

AI & Data: Ollama, Gemini API, n8n, Pandas, NumPy, Scikit-Learn

Certifications

RHCSA – Red Hat Enterprise Linux 10 | Oracle Cloud Infrastructure Foundations Associate | Oracle AI Foundations Associate

Tata Cybersecurity Analyst (Forge) | Belkasoft Advanced Digital Forensics | Google Cloud Arcade Trooper | Decodex 2025 Round 2 Qualifier

Experience

Vice President

2026 – Present

Computer Society of India (CSI), MIT CSN

- Lead strategic technical initiatives impacting 500+ students; directed Technophilia, a national-level technical fest.
- Organized InspireX hackathon and technical workshops while coordinating cross-functional student teams.
- Coordinated executive workshops with the Intelligence Research Institute (IRI), USA.

Founder

2025 – Present

Rexora Media

- Founded a technology and creative solutions agency delivering software, AI automation, cloud-hosted applications and UI/UX solutions.
- Built and deployed production applications using Node.js/Express, Supabase, Vercel and cloud infrastructure.

Projects

FreedomOps – Self-Hosted AI DevOps Assistant

Ollama, Podman, Ansible, Linux

- Built a self-hosted AI DevOps assistant using a local Ollama LLM for infrastructure troubleshooting and operational automation.
- Developed container recovery and automation workflows using Podman, Ansible playbooks and Linux shell scripts.

AI-Driven Multi-Vendor Network Security Compliance Auditor

AI, Cybersecurity, Python

- Developed an SIH-focused security solution concept for automated compliance auditing across multi-vendor network environments.

Serverless AI Content Moderation Tool

Vultr, REST APIs

- Designed a scalable cloud-hosted moderation pipeline on Vultr capable of handling 1000+ concurrent requests.

AI Automation Workflow System

Docker, n8n, Gemini API

- Automated a Gmail workflow using Docker, n8n and Gemini API, reducing manual processing effort by 80%.

TTZ Gym Management System

React, Node.js, Express, Supabase

- Built a production management platform with memberships, payments, analytics, attendance and automated WhatsApp reminders.

Leadership & Achievements

- Organized Technophilia 2K26 and InspireX; led technical events and cross-functional teams across 10+ initiatives.
- Engaged 130+ participants through peer-learning workshops and coordinated executive workshops with IRI, USA.
- Selected for B.Tech Honours with Research Programme and earned RHCSA certification on RHEL 10.
